

1 what is meta tag's?
2
3 Meta tags are HTML tags that provide information about a webpage's content to search engines and users. They are used to define metadata about an HTML document, which is data about data. Meta tags are typically used to specify: character set, page description, keywords, author of the document, and viewport settings
4
5 what is iot?
6 IoT stands for Internet of Things, which is a network of physical devices, appliances, and vehicles that are equipped with software, sensors, and network connectivity. These devices can communicate with each other and the cloud, and can also exchange data with other devices and systems over the internet. The main goal of IoT is to create devices that can communicate with each other and users in real time, without human intervention.
7 IoT devices are not limited to computers or machinery. They can include anything with a sensor that is assigned a unique identifier (UID). IoT devices can collect and share data, allowing businesses to monitor, manage, and automate their operations more efficiently.
8 IoT has many consumer uses, including: Connected vehicles, Connected health, Home automation, Wearable technologies, and Appliances with remote monitoring capabilities.

11 what is difference between google search engine and chatgpt?
12 Google is a search engine that is great for finding information quickly, while ChatGPT is a language model that can generate human-like responses to queries. The choice between the two depends on the type of information you are looking for and the context of your search.
13
14 what is BIGDATA?
15 Big data is a term that describes large, complex data sets that are made up of structured, unstructured, and semi-structured data. These data sets are so large and diverse that traditional data management systems can't store, process, or analyze them. Big data is also known as the three "Vs": volume, velocity, and variety
16
17 what is seo?
18 Search Engine Optimization (SEO) is the process of improving a website's technical configuration, content relevance, and link popularity so that its pages rank higher in search engines. This can lead to an increase in traffic to a website, as search is one of the main ways people discover content online.
